Summary

Final-year Computer Science engineering student with a technical foundation in data management, system workflows, and application behavior design. Experienced in analyzing structured data, documenting end-to-end processes, coordinating cross-functional tasks, and transforming raw information into organized, decision-ready formats. Strong ability to bridge technical execution with product and operational needs.

Education

B.Tech in Computer Science SRM Institute of Science and Technology, Ramapuram, Chennai CGPA: 8.85 / 10.0	2022 – 2026
High School Diploma P.S.B.A English School, Ch. Sambhaji Nagar (Aurangabad)	2015 – 2022

Experience

Marketing Intern Tanayanand Private Limited – Wings India 2026, Hyderabad	Dec 2025 – Jan 2026
---	---------------------

- Supported marketing and business operations for a large-scale industry event, contributing to planning, coordination, and execution activities.
- Worked closely with internal teams to understand requirements, align deliverables, and ensure smooth execution across functions.
- Assisted in gathering feedback, organizing information, and supporting decision-making related to event workflows and initiatives.
- Contributed to coordination between stakeholders, helping translate requirements into actionable tasks and timelines.
- Maintained structured documentation and task tracking to support operational and product-related activities.
- Received a **Letter of Appreciation** for professionalism, adaptability, and contribution to successful event execution.

Projects

Book Scraper & Viewer	2025
----------------------------------	------

- Designed a system to collect, organize, and present large volumes of structured information from multiple online sources.
- Planned the overall data flow, including how information is collected, cleaned, stored, and displayed for end users.
- Worked with a dataset of over 50,000 records, focusing on organization, consistency, and ease of access.
- Implemented features that allow users to search, filter, and view data efficiently, improving usability and clarity.
- Focused on structuring raw information into meaningful formats that support analysis and decision-making.
- Documented workflows and system logic to ensure clarity, maintainability, and ease of understanding for future improvements.

AI-Based Image Generation Interface	2024
--	------

- Developed a user-oriented application with emphasis on clear interaction flow and ease of use.
- Worked on defining user inputs, system responses, and overall application behavior from a functional perspective.
- Coordinated different components of the system to ensure smooth integration and reliable output generation.
- Focused on understanding user requirements and translating them into structured application workflows.
- Improved stability and user experience by handling invalid inputs and ensuring predictable system behavior.
- Gained experience in documenting system processes and understanding end-to-end product flow from user input to final output.

Skills

- **Technical Skills:** Python, SQL, MySQL
- **Developer Tools:** Git, VS Code, PyCharm, IntelliJ IDEA, GitHub
- **Visualization:** Tableau, Power BI, MS Excel

Certifications

- Oracle Generative AI Professional Certification — Oracle (2025)
- Career Essentials in Data Analysis — Microsoft & LinkedIn (2025)
- Artificial Intelligence and Business Strategy — LinkedIn Learning (2025)
- Data Analytics & Visualization Job Simulation — Deloitte (2025)
